## Portable Water Vacuum & Transfer

Capture and transfer up to 3000 gallons of water per hour with the compact RPV vacuum system. Features a powerful, industrial 2-stage vacuum motor. A heavy duty, stainless steel pump transfers wastewater up to 100' away while vacuuming continues...no need to stop and dump the collection tank. It is ideal for interior and exterior facilities maintenance contractors who need to collect wash water or for restoration contractors who need to pick up large volumes of water after a fire or flood. (for use with cold water or hot water up to 200°F)
